GOALS

I'm looking for an organization where I can be helpful and help develop it to reach its goals and would like to do some work related to my skills, now I want to extend my career as a developer on C#.net. I have a lot of experienced people in this field and I am ready to learn how to work as a team of teamwork to achieve the goal.

WORK EXPERIENCE

Programmer

Faculty of Medicine Ramathibodi
Hospital, Mahidol University

4 months (Intern)

- This project is about asking for new innovations for Ramathibodi Hospital. I'm using C# ASP.Net6 The project has verified OTP,CRUD, Core API, Dependency Injection, Authentication Login, Using SQL server, Pattern MVC, Docker

RFID School Van Project (Final Project)

- This is project is a my final project in the university. It is a web application to inform the student's status to getting on the bus, connects to the IOT device, and the student uses RFID to tap the card and sends a notification via Line App and Email. (PHP language, phpMyAdmin)
